

AerResearch

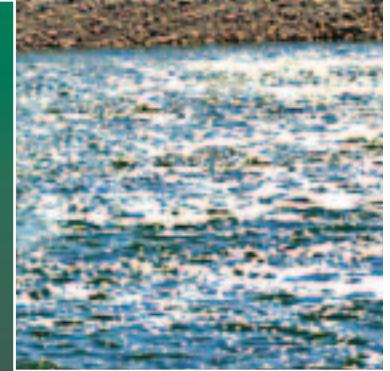

**Lagoon Based
Water Recovery
Systems**

INNOVATION

“AerResearch’s unique retrievable design saved money and delays.”

Roland Klockow, P.E., Consulting Engineer, Granger, Indiana

AerResearch solves problems with special features not available anywhere else. Professional design, installation and startup services make sure that your project is a success. Partial or complete treatment systems are custom designed to meet your needs. Your AerResearch design will minimize construction and maintenance cost and maximize energy efficiency. The bottom line is value. The guarantee is from AerResearch.

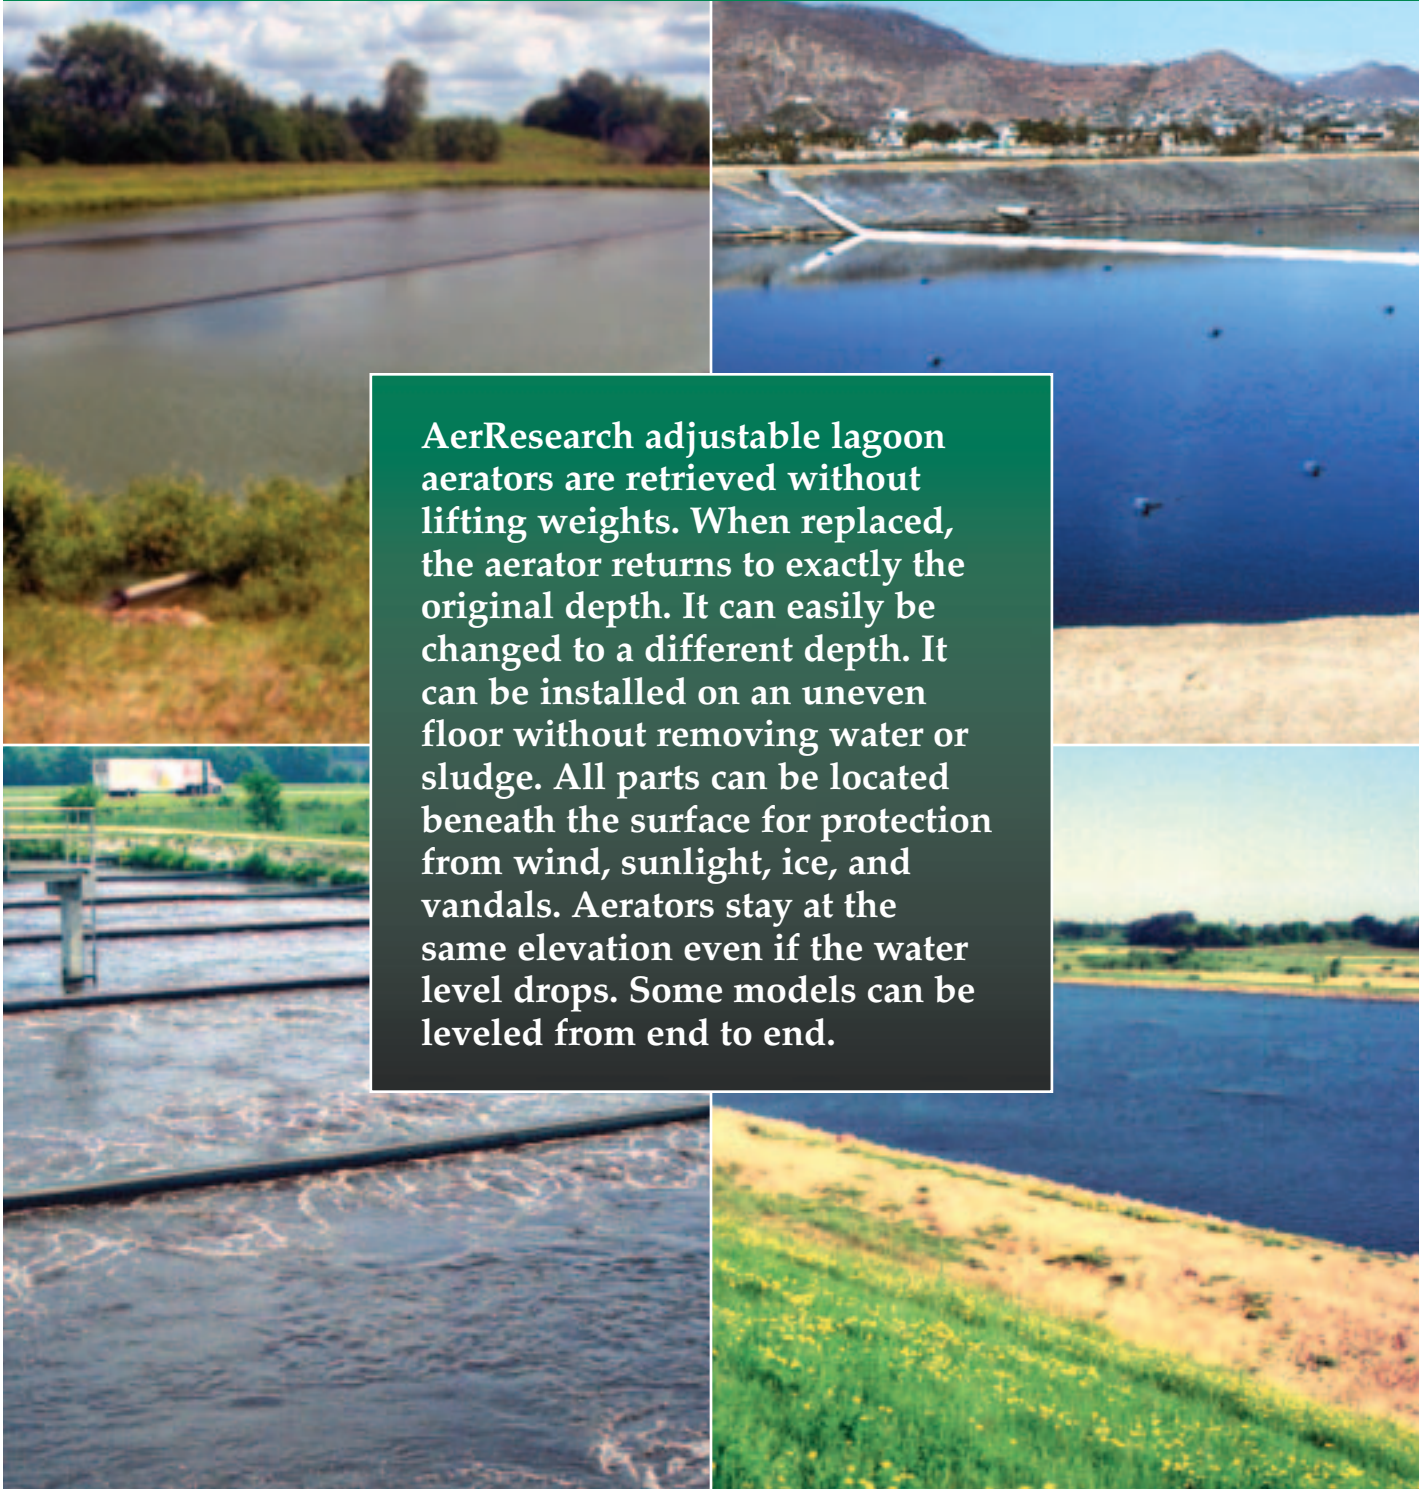

“Our AerResearch system does everything we hoped for - and more.”

Ken Ashley, General Manager, SeaPac of Idaho, Buhl, Idaho

EXPERIENCE

CONFIDENCE

“Our next installation will be AerResearch - just like our last.”
Jim Larscheid, P.E., Department Manager, Sinclair Oil, Rawlins, Wyoming

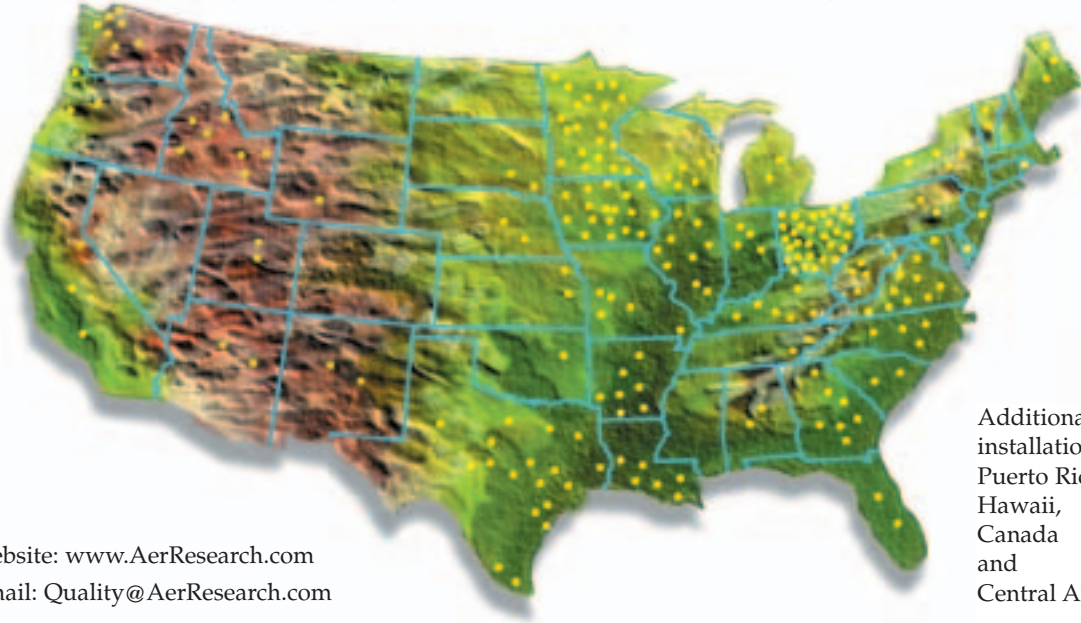

AerResearch adjustable lagoon aerators are retrieved without lifting weights. When replaced, the aerator returns to exactly the original depth. It can easily be changed to a different depth. It can be installed on an uneven floor without removing water or sludge. All parts can be located beneath the surface for protection from wind, sunlight, ice, and vandals. Aerators stay at the same elevation even if the water level drops. Some models can be leveled from end to end.

“...features are impressive...technical assistance during design was excellent.”
Tate Lanning, P.E., Consulting Engineer, Raleigh, North Carolina
